To Whom It May Concern:

Jefferson Davis County School District suffered extensive structural damage as a result of Hurricane Katrina. Our institution was overwhelmed with trying to re-open while at the same time having to compile the necessary documentation for our insurance and Federal Funding (FEMA) claims. In desperate need of assistance, we retained the services of Scott M. Favre PA to assist us with our insurance claim and FEMA Claim. By hiring Mr. Favre, we have saved valuable time and have been able to move forward with our repairs.

Mr. Favre's understanding of insurance policies and construction has enabled us to collect additional insurance funds that were not originally offered to us by our insurance provider. On one occasion, Mr. Favre was able to have our insurance company pay for the complete demolition and re-build of one of our elementary school gymnasium buildings even though the insurance companies original damage estimate did not include this.

Not having the knowledge of how to handle such a large insurance loss, early on, I placed the majority of my trust with our insurance adjuster. I soon learned that my adjuster did not have our best interest at hand. Immediately after retaining Mr. Favre, the direction of our claim moved in a positive manner. Our claim no longer was one sided. Mr. Favre was able to properly identify all of our damages and force the insurance company to move forward.

I am confident that Mr. Favre could greatly assist you with your claim. I have personally worked with Mr. Favre and have been very delighted with his services. If you would like to speak with me about Mr. Favre you can contact me at

Sincerely,

A handwritten signature in cursive script that reads "Allen Ray Dyess".
