

PEARL RIVER COMMUNITY COLLEGE  
MISSISSIPPI'S PIONEER COMMUNITY COLLEGE

September 18, 2008

To Whom It May Concern:

From a structural point of view, Pearl River Community College was Mississippi's most heavily damaged two-year institution of higher learning during Hurricane Katrina. With damages estimated at more than \$50 million, our institution needed the assistance of a highly qualified professional to help determine our loss and to guide us in the process of presenting our insurance claim.

Scott Favre has proven to be an excellent resource for us. His knowledge of construction and insurance law combined with his experience in handling claims in Florida following Hurricanes Ivan and Dennis has been of great assistance to us. Mr. Favre and his colleagues have provided for a thorough and accurate accounting of our losses. He has proven to be dogmatic in his representation of our claim and is willing to stand up for his client.

Not having the responsibility for recovering an institution from such a tragedy during my career, I was somewhat at a loss on the proper steps to take to ensure that our claim was properly adjusted. Mr. Favre provided us with excellent guidance in the remediation, repair and restoration of our buildings. His efforts led us to a very fast resumption of classes at our college and provided us with a thorough analysis of our loss.

I believe that you will find him to be an excellent resource for your organization in analyzing and presenting your insurance claim. I recommend your consideration of his services.

Sincerely,

William Lewis, Ed.D.  
President
